DIRECTORS'

REVIEW TO THE MEMBERS

On behalf of the Board of Directors of AKD Securities Limited, we are pleased to present the unaudited financial statements of the Company for the half year ended 31 December 2023.

Economic Review

The half-year was marked by a period of notable positive developments as import restrictions were partially lifted (though still subdued) following the announcement of the IMF stand-by arrangement in July-2023, backed by further inflows from friendly countries including the UAE and KSA during the month. Furthermore, structural measures including revisions in electricity base tariff, increased gas prices, crackdown on illicit cross border trade, emergence of the SIFC initiative and overall curbs on grey-channel operations in FX market were taken by the interim setup under the pre-existing IMF agreement. However, short-term indicators continued to show a bleaker picture scenario, with CPI averaging at 28.8%YoY during 1HFY24 (vs. 25.0% in 1HFY23). Regarding external balances, CAD and SBP FX reserves during the half stood at US\$670mn (down 82%YoY) and US\$8.2bn (up 47%YoY) by Dec'23 end. The yearly improvement in the aforementioned balances were largely due to administrative controls on imports (down 35%YoY in 1HFY24) alongside lower commercial/industrial activity, which kept FX outflows to a minimum. Further, quarterly GDP growth also saw an improvement, recording a growth of 2.13%YoY during 1QFY24 (vs. -0.29%YoY in FY23), largely backed by strong recoveries in agricultural output.

Equity Market Review

The equity markets have shown considerable volatility, with the KSE100 index exhibiting significant growth. Over the period, the index saw an increase of over 21,000 points, marking a 54%YoY growth compared to Dec'22. The fluctuation in the index remained notable, with highs and lows ranging between 66,391pts and 41,327pts, respectively. The rise was largely on the back of a much more secure external position post the IMF SBA (and subsequent topping up of SBP's FX reserves), compared to earlier concerns of country's financial default during the past several periods. ADTV (Average daily trading volumes) also exhibited recovery, averaging at 589.5mn shares (up 93%YoY), while the market capitalization also improved by 14%YoY by Dec'23 end, to end at US\$26.5bn. In general, equities gained traction primarily due to expectations of policy rate cuts by the SBP during 2HFY24. The positive sentiment was further bolstered by announcement of the General Elections in Nov'23.

In terms of sector performances, the Automobiles and Assemblers, Refineries, and Transport sectors emerged as top returning during the first half compared to 2HFY23, gaining 114%/79%/75% during the period. Further, Power Generation and Mutual Funds sector also demonstrated growths, with both registering increases of 74%/73.5% during 1HFY24. Conversely, in terms of negative performances, REITS and Vanaspati and Allied Industries remained down by 1.3%/0.1%, respectively.

On the flows front, foreigners remained the net buyers of US\$71.01mn during the outgoing year, with major inflows observed in Commercial banks (+US\$24.1mn), Power Generation (+US\$15.1mn) and Cements (+US\$14.8mn). Cumulatively, Banks/DFIs (-US\$92.4mn) and Mutual funds (-US\$51.04mn) saw their portfolios witnessing the largest net outflows while Insurance and companies absorbed most of the selling throughout the year, with a net buy of US\$60.3mn and US\$52.45mn, respectively.

Debt and Currency Market Review

Country's FX reserves ended the year at US\$8.2bn, significantly up by US\$3.76bn during FY23 end. This is largely attributable to securing the first tranche of IMF's SBA alongside further inflows from bi-lateral partners majorly including KSA and UAE. Domestic currency remained relatively stable during the outgoing period, ending the year at PkR281.8/US\$ (vs. PkR286.9/US\$ by Jun'23), amidst episodes of strengthening driven by open market curbs during the period. The stabilization efforts came in after the domestic currency touched record lows at PkR307/US\$ in early September. On the money market front, KIBOR yields ended the period at 21.21% as SBP continued to advocate for a stable policy rate during the period, however lower from highs of 24.6% in early Sept'23. Overall, inflation continues to remain sticky as near-term adjustments in food and energy prices continue to keep CPI expectations on the higher end. With real rates in positive territory on a forward-looking basis as per the SBP, the tightening cycle is expected to have reached its conclusion.

Commodity Market Review

International commodity prices remained volatile throughout the second half of FY24, although down from their multi-year highs in FY23. With regards to oil prices, OPEC's insistence of supply cuts and skirmishes in the Middle East region continued to pressure crude on the upside, surpassing US\$90/bbl during mid-September. Conversely, lower demand from China and global recessionary fears contributed to crude's downward price pressure, with Brent ending the half year at US\$77/bbl. Further, grains experienced some relief from earlier spikes due to improved harvests and export agreements, with wheat and corn futures remaining largely in line with long-term averages, averaging at US\$601/488 per bushel, respectively. On the other hand, Coal prices remained volatile as well, mainly driven by higher demand due to winters in Europe alongside shifting consumption patterns in China. However, with demand easing, international coal prices (RB-1) decreased to US\$108/ton at Dec'23 end, after peaking at US\$134/ton during the half year. Additionally, the industrial metals market experienced varied pressures, with copper and steel prices being majorly being affected by production constraints in the winter season. As a result, the year closed with copper prices at US\$3.89/lb and steel prices at US\$535/ton.

Future Outlook

As Pakistan approaches the transition to a new government, it is expected that the current uncertainty and political unrest will diminish once the new administration assumes office. Moreover, the positive initiatives undertaken by the interim setup are anticipated to lay the groundwork for the incoming government, particularly as the country embarks on a new IMF program in April'24, following the expiration of the SBA. Looking ahead, a declining trend in the NCPI and the policy rate, and a subsequent recovery in economic activity are expected to keep fundamentals strong moving forward.

Operating and Financial Performance

During the half yearly ended 31 December 2023, the Company reported the following results:

Equity brokerage remained the key component of operating revenue. Similarly, money market and commodity brokerage segments have shown impressive growth over the corresponding period. The total operating & admin expenses of the company declined by 20% compared to the corresponding period.

Acknowledgment

The Directors wish to record their gratitude to the Company's valued clients, shareholders, business partners and other stakeholders for their continued trust that they have reposed in the Company. The Board would also like to record their appreciation to the employees of the Company for their commitment and dedication.
