DIRECTORS' REVIEW TO THE MEMBERS

On behalf of the Board of Directors of AKD Securities Limited, we are pleased to present the unaudited condensed interim financial statements of the Company for the half year ended 31 December 2024.

Economic Review

The first-half of the fiscal year was marked by significant positive developments for the country. The successful signing of the US\$7.0 billion EFF program with the IMF has paved the way for improvements in the country's fiscal and external position. A significant slowdown in the inflation rate to below 5% has allowed notable monetary easing. However, large-scale manufacturing activity contracted by 1.9%YoY in 1HFY25, mainly due to a slowdown in construction-related activity. That said, export-related sectors have started showing signs of recovery. The current account turned into a surplus, while the fiscal sector remained resilient, with the country posting a primary surplus of 2.9% in 1HFY25. Inflation eased to 4.1%YoY in Dec'24 compared to 29.7%YoY in SPLY, primarily due to a decline in food prices and a comparative high base effect. On the external front, current account balance during 1HFY25 posted a surplus of US\$1.2 billion, compared to a deficit of US\$1.4 billion in SPLY, with the turnaround mainly led by 33%YoY surge in workers' remittances to US\$17.8 billion. Along with inflows from multilateral and bilateral partners under IMF, SBP-held FX reserves increased to US\$11.7 billion compared to US\$8.2 billion in SPLY. However, 1QFY25 GDP growth slowed to 0.9%YoY vs. 2.3%YoY in SPLY, driven by a slowdown in agricultural growth to 1.2%YoY from 8.1%YoY in SPLY.

Equity Market Review

KSE-100 posted the second-highest half-yearly returns in two decades, returning 47% during 1HFY25. The rally was primarily supported by rerating due to ongoing monetary easing and improving macro indicators under the three-year IMF program. Market participation also remained robust, with average traded volume increasing by 42%YoY to 884mn shares. Higher volumes, coupled with increased share prices, led to 81%YoY surge in average traded value. Consequently, Value-to-Volume ratio (average price per traded unit) rose to PkR42 per share, up from PkR33 per share in SPLY.

In terms of sector performances, Oil & Gas Marketing, Pharmaceutical, and Transport emerged as the top-performing sectors, gaining 112%/109%/109% during the half-year, respectively. The Refinery and Oil & Gas Exploration sectors also demonstrated growth, with both registering 83% returns during 1HFY25. Conversely, only the Synthetic and Power Generation sectors posted negative returns, declining by 9% and 3% during the period, respectively.

Foreign investors offloaded US\$187 million worth of equities, mainly due to FTSE rebalancing. Notably, Pakistan was reclassified from Secondary Emerging to Frontier Market status, effective from Sep 23, 2024, as the country failed to meet the required securities count. The highest outflows were recorded in Banks, Fertilizer, and E&Ps, amounting to US\$61mn, US\$57mn, and US\$41mn, respectively. Meanwhile, foreign investors increased their exposure in the Technology sector, with an inflow of US\$24mn.

Mutual Funds, Companies, and Individuals absorbed the aggressive foreign selling, rushing to buy equities at lower valuations, largely driven by a rerouting of insurance sector flows through mutual funds. Mutual Funds increased their exposure to equities the most, adding US\$183mn, followed by Companies and Individuals with a net buy of US\$27mn and US\$26mn, respectively. However, Banks, Other Organizations, Brokers, and Insurance remained net sellers, with outflows of US\$21/17/6/5mn, respectively.

Debt and Currency Market Review

The current account balance recorded a surplus of US\$1.2 billion during 1HFY25, compared to a deficit of US\$1.4 billion in SPLY, primarily driven by higher workers' remittances. Along with inflows under the IMF program and SBP's US\$3.2 billion FX purchases from the domestic market in 4MFY25, SBP-held FX reserves increased to US\$11.7 billion from US\$8.2 billion in SPLY. Consequently, the Rupee appreciated by 3.3%YoY against Greenback, closing at PkR278.2/US\$.

Inflation eased to 4.1%YoY in Dec'24 compared to 29.7%YoY in SPLY, primarily due to lower food prices and a high base effect. Easing inflation and a controlled external position led the central bank to continue its monetary easing, cutting the policy rate by 750bps during the first-half to 13% by Dec'24. As a result, 3-month KIBOR rate declined by 810bps during the 1HFY25 to 12.14% by Dec'24, compared to 20.24% at FY24-end. Similarly, secondary market yields also dropped, with 6-month yields declining to 19.9% by Dec'24. We expect SBP to continue easing, bringing down real interest rates further, albeit not at the same pace as previous cuts.

Commodity Market Review

Ample supply and sluggish demand kept oil and industrial commodity prices moderate in the first-half of 2025. Oil prices remained under pressure, with Brent crude declining by 9%YoY in 1HFY25 to US\$76.3/bbl due to weak demand stemming from China's prolonged economic slowdown, weak manufacturing activity in the US and Europe, and concerns surrounding the US elections. Additionally, rising output from non-OPEC producers such as the US, Canada, and Guyana offset OPEC+'s voluntary production cuts. Similarly, industrial metal prices remained subdued due to weak economic activity, particularly a slowdown in China's construction sector, weighing on global demand with CRC prices falling by 13%YoY. The grains market, however, experienced some relief due to improved harvests in Northern Hemisphere exporting countries and stable demand. Wherein, avg wheat prices dropped by 8%YoY to US\$552/bushel in 1HFY25, while corn prices declined by 16%YoY to US\$408/bushel. Meanwhile, gold prices remained strong due to continued buying by central banks of emerging markets and the initiation of rate cuts by developed economies. Avg. gold prices in 1HFY25 increased by 32%YoY to US\$4.3/lb due to a shortage of copper ore. The trends for other commodities in 1HFY25 were as follows: Coal (1 2%YoY), Urea (16%YoY), PVC (11%YoY), and CRC (113%YoY).

Future Outlook

With notable improvements in macroeconomic indicators, economic activity is also gradually picking up, as evidenced by growth in the export-related sectors. Furthermore, easing interest rates, a stable exchange rate, and a slowdown in inflation are expected to further support economic activity. However, rising input costs and a high comparative base would keep agricultural growth slow in FY25. Furthermore, the upcoming IMF review is expected to proceed smoothly as IMF quantitative targets are largely met. Additionally, any progress on climate financing by the IMF would further enhance investor sentiment. The continued commitment by the World Bank, with the signing of a 10-year country policy framework worth US\$20 billion in key development areas and an additional US\$20 billion commitment to the private sector through IFC, would boost positivity and strengthen foreign confidence. Meanwhile, PSX is likely to continue its upward trajectory as funds shift from fixed income to equities, supported by declining fixed income returns.

This represents excess over fair value of net assets of AKD Securities Limited (AKDSL) on its acquisition. The recoverable amount of goodwill was tested for impairment by allocating the amount of goodwill to respective assets on which it arose, based on value in use in accordance with IAS-36 "Impairment of Assets". The value in use calculations are based on cash flow projections. These are then extrapolated for a period of 5 years using a steady long term expected demand growth of 3% and terminal value determined based on long term earning multiples. The cash flows are discounted using a discount rate of 17.44%. Based on this calculation no impairment is required to be accounted for against the carrying amount of goodwill.
